

## Overview

**BeeDerma 800+** is the leading product in wound treatment Line - BeeDerma™ produced by BeePharma Pty Ltd - a pharmaceutical company.

While the chronic wound is considered as a “global hidden pandemic”, BeeDerma™800+ has the novel approach to deal with this concern... BeeDerma™800+ is an “All-In-One treatment” product.

## Features and Benefits

BeeDerma™800+ is a 15gr cream, scientifically Developed from the Australian Medical Grade Honey (MGH)- with 800 mg/kg of the active ingredient Methylglyoxal (MGO) ...The High MGO substance is the key of MGH that promises unique antimicrobial activity ( researches show).

BeeDerma™800+ has Antibacterial, Anti-inflammatory, Antibiofilm, Antioxidant, immuno-stimulatory, Osmotic effect, Odour reduction, activity. These Features ensure Cheaper, Quicker, and easier treatment of chronic wounds.

Medical Grade Honey(MGH) has been shown to be especially useful against antibiotic-resistant bacteria: MRSA, MSSA, and VRE. The many functions of MGH thus not only clear wound debris, maintain hydration, control inflammation, and stimulate healing, but also sterilize the wound.
